

Multi-omics data integration hackathon

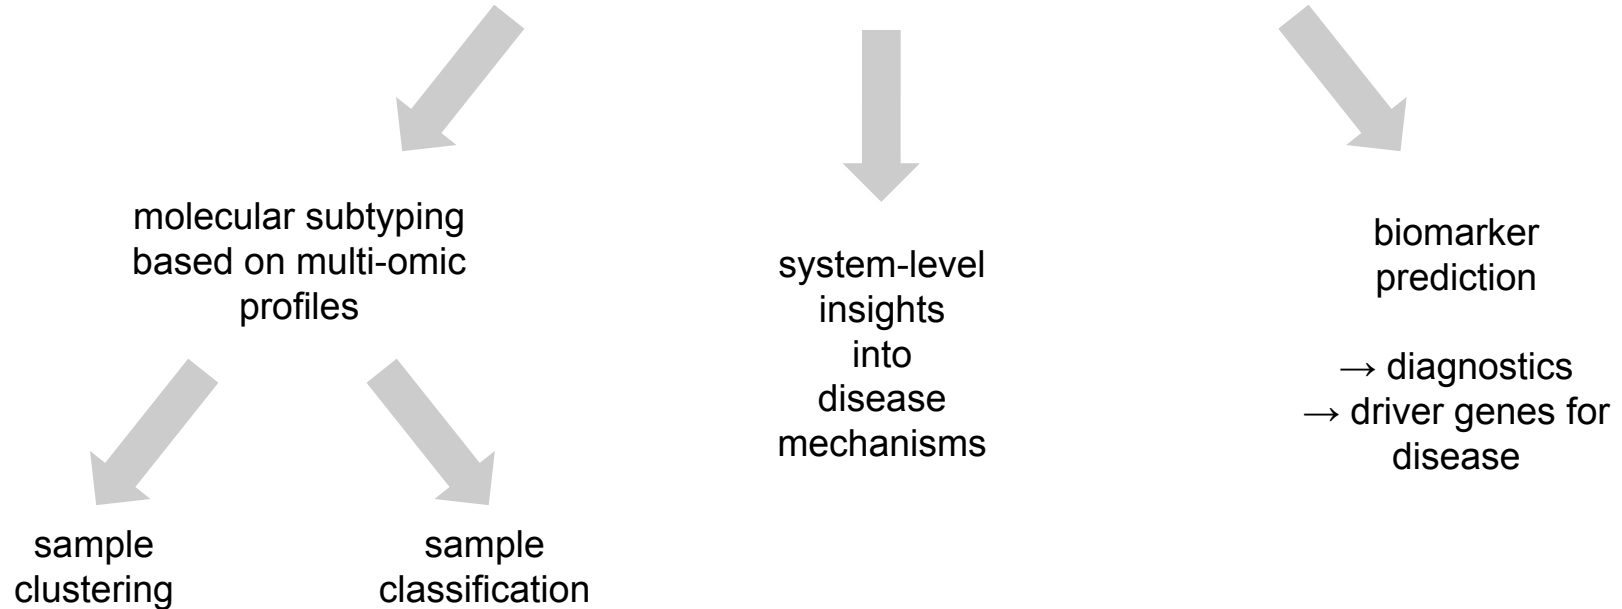

September 8 - 15, 2021

Karolina Sienkiewicz

Weill Cornell Graduate School of Medical Sciences,
Cornell University

Why are we integrating multi-omic datasets?

Integration challenges

Different number of samples

Data heterogeneity

Missing values in feature
matrices

Normalization across data
types following different
distributions

Sparse datasets

Feature selection

Methods for multi-omic data integration

Hackathon schedule

Time (CET)	Day 1 Wed Sep 8	Day 2 Th Sep 9	Day 3 Fr Sep 10	Day 4-5 Sat-Sun Sep 11-12	Day 6 Mon Sep 13	Day 7 Tue Sep 14	Day 8 Wed Sep 15
2 - 3	Opening remarks	Lecture #1	Networking/Social		Lecture #3		 Hackathon presentation
3 - 4	Hackathon meeting #1 3pm-5:30pm	Lecture #2			Lecture #4	Hackathon meeting #5 2:30pm-5:30pm	
4 - 5		Hackathon meeting #2 4pm-6:30pm	Hackathon meeting #3 3:30pm-6pm		Hackathon meeting #4 4pm-6:30pm		
5 - 6							
6 - 7	Networking/Social						

Hackathon materials: <https://github.com/sienkie/multi-omics-hackathon>

Multi-omics data integration

This repository contains materials for **Multi-omics data integration** hackathon for [#NGSprint2021](#).

Running the tutorial materials

To run the tutorial materials you will need:

1. The Jupyter notebook with the R language support:
 - Jupyter Notebook ([installation information](#))
 - R from CRAN-R ([download from here](#))
 - IRKernel which enables the usage of R from the notebooks ([see tutorial here](#))
2. R packages (see the instructions in the *set_up.R* file)
3. python3.6+ ([download from here](#))
4. SUMO: the subtyping tool for multi-omic data ([installation information](#))

R (tidyverse) resource:
